more than 2 decades of innovation, expertise and experiences in water and wastewater treatment technologies and systems.

1994.
since

Headquarters & regional presence.
Based in Singapore as our centre of excellence and innovation, we have offices, agents and OEM partners in Australia, ASEAN and other parts of Asia including India, Pakistan, Bangladesh etc.

A multiple-award winning water firm.
A rare water company in the region having won multiple awards including Singapore Prestige Brand Awards (SPBA) and Singapore Enterprise 50 Awards.

In-house capabilities and facilities.
We have in-house teams and factories to provide full-fledged supplies and services from process designs, production, testing and commissioning, post-sale support and post-completion operations and maintenance.

A company of German SKion GmbH.
First water company in Asia invested in by the large German SKion Group that owns many water and wastewater related companies in Europe and North America.

snap shots.
prestigious & strategic shareholder since January 2017.

SKion GmbH
SKion is wholly owned by German entrepreneur Susanne Klatten who is an anchor shareholder of BMW. Through SKion, Mrs Klatten owns 100% of Altana AG and shareholdings in SGL Carbon, Avista Oil, Gemalto and Nordex.

Water Portfolio
Since 2010, SKion has built a portfolio of investments in the field of water technologies - a comprehensive range of water/wastewater treatment technologies for both municipal and industrial customers is hence available.
and the first and only investment of SKion in water business in Asia.
strategic SKion Group’s partnership.

besides funding for growths, we have access to our European and North American partners’ diverse, advanced and innovative technologies for applications in Asian and Australian markets.
full Suite of products & services.

We have built a comprehensive range of products and services for up- and down-stream applications, recycling and reuse, post-sale maintenance and operation services. Our customers need not deal with multiple vendors/contractors for their projects.
core technologies & expertise.

specialised in all 3 key proven and complementary water technologies in-house.

**Ultrafiltration (UF)**
Low-pressure driven membrane filtration technology to separate fine particulates, solids and a majority of bacterial/viral contaminants that have particulate sizes exceeding 0.01 micron.

**Reverse Osmosis (RO)**
Mid-and-high-pressure driven membrane filtration technology to remove dissolved solids including minerals, and reduce the conductivity/total dissolved solids (TDS) to meet potable and industrial needs.

**Ion-exchange (IX)**
Water purification process in which ions of one undesired substance are replaced/exchanged by similarly charged ions of another substance, by using a suitable type(s) of resins for the exchange process.
core systems & supplies.

**Standard and modular systems.**
All-in plug-and-play simplicity for easy in-situ installation.

**Modular skids for larger capacity.**
Easy to be shipped, transported and installed for large plants.

**Containerised systems.**
Fitting all into a box. By thinking out of the box.

**Designed-and-built plants.**
More than meeting clients’ and sites’ specific requirements.
supplementary & auxiliary systems.
for stand-alone, pre-treatment, post-treatment & other applications.
specialist for premium sectors.

We have acquired expertise and experiences in designing and making high quality, high performing water and other environmental engineering systems that meet the most stringent and demanding international and industrial standards and compliances of these sectors.
and many other sectors.
Serving other residential, commercial and industrial sectors as well.

- Semiconductor & electronic processing
- Petrochemical & chemical processing
- Aviation parts & components processing
- Automobile production & assembly
- Solar power panel production
- Textile & garment processing
- Paint manufacturing
- Industrial park & zone
- Office building & commercial complex
- Residential estates and condominium
- Resort, hotel & theme park
- Hospital, medical centre & clinic
in-house capabilities/facilities.

Unlike other water engineering solution specialists/providers.

Except for fabrication of round metal pressure tanks and control panel boxes, we do everything for our water systems in-house, from innovation, process and engineering designs, to fabrication and assemblies at our own factories (and testing and commissioning at clients’ sites). These enable us to control and manage qualities, timing of production and deliveries and performance optimisation of our systems exceptionally well.
Beyond quality, reliability and durability.

We strive to transform the most advanced, sophisticated and even complicated water technologies into most intelligent, hassle-free and user-friendly water treatment systems for your day-to-day operations and applications, giving you values well beyond the conventional offerings of quality, reliability and durability in the water industries.
It has to be intelligent to be simple.

24/7 systems.

Well instrumented.
Intelligently programmed.
Minimal human attendance required.

All our water and environmental protection systems are well instrumented and intelligently programmed for 24/7 operations. Operating processes, philosophies and functions of our systems are fully automated where practicable. Excellent process designs, high-quality instrument and great programming are all parts of making our systems achieve the extraordinary performances of simple, friendly and hassle-free day-to-day operations.
post-sale services.

Regular maintenance services.
Trained and experienced technicians in Matten and agents/distributors in the region to provide our end-user customers with regular maintenance services to keep their treatment facilities in tip-top conditions at all time.

24/7 operations of plants.
Experienced technicians to operate and manage customers’ treatment facilities on a 24/7 basis, so customers are able to focus on running their core businesses.

Replacements of parts & components.
We make customers’ lives easy by keeping stocks of or procuring required parts and components for replacements, as well as providing services for the replacement works.
expansive distribution networks.

You are never too far for us.

The first and only water company in the region to build an official distribution channel, by appointing agents, distributors and installation partners. Our ever expanding networks make reaching out to and working closely and effectively with you possible.

Holding your hands through.

From sale enquiry to post-sale support, our well guided and trained partners on the local ground will work with you closely to see your projects and post-sale needs through. You will be better able to focus on your core businesses, than be distracted by your utility needs.
we do it better than others.

You need not work with multiple vendors for your projects.

We have built a comprehensive range of products covering upstream, mid-stream and down-stream filtration/purification needs, as well as a full range of services from project implementation to post-sale technical support and replacements.

Technical compatibility between and among our systems.

Being specialised in all 3 key and complementary water technologies (UF, RO, IX) and other supplementary systems in-house, we are able to optimise the technical and operating compatibility between or among these systems when required.

Never too far to serve & support you through our networks.

As the first water company in the region to build up an official distribution channel, we are able to serve and support you more closely, more effectively than the rest, from the moment you make an enquiry to your needs for post-sale services.

Timely production, delivery & site execution.

We have full-fledged expertise, teams and production facilities in the region to carry out works from designs to post-sale stages. Hence, we have better control and management of activities and schedules than others to achieve your project’s schedules.
we do it better than others.

**Well instrumented systems for 24/7, hassle-free operations.**

Our systems are designed and made to achieve giving our customers extraordinary values in “water technologies made simple”. They are well instrumented for 24/7, relatively fail-proofed and hassle-free operations.

**Expertise in complying with international sanitary standards.**

We have established proven expertise and experiences in designing, making and install systems that meet the world class sanitary/hygienic standards for food and beverage, pharmaceutical production. You need not go far to find a F&B/brewery water specialist.

**ABS-certified SWRO systems for desalination in oil & gas & other sectors.**

For oil and gas applications, our SWRO systems are certified by American Bureau of Shipping (ABS) to meet the most stringent safety and other industrial standards. They are more than fit for desalination in other industries.

**Systems compliant with Australia’s AS3000 Standards for mining.**

We have acquired the expertise and experiences in designing and making systems that comply with Australia’s most stringent AS3000 Standards, applied by its mining industry, locally and worldwide.
client references

Most indisputable testimonials.

We have supplied to a number of well-known local and international customers of varying industries, located in Singapore or in the region. They are the most indisputable testimonials for our technological capabilities and deliverables. We look forward to serving many more.
extensive media coverage

The media coverage speaks about us. And speaks for us.

The external media has written about our milestones and success stories in the past. About our innovations, business strategies, expertise and capabilities, branding and differentiation, unique value proposition and more. The extensive coverage speaks volume for us.

Innovating wastewater treatment

Taking the plunge into water treatment

Water firm drinking in new success

MATTEN - It's All About Water Technologies Made Simple

MattenPlant sows its seeds outside Singapore
multiple awards

“Enterprise 50 Awards for structuring for optimal and rapid growth...”

E50 Awards has been long established and is one of the most prestigious business awards in Singapore. Co-led by KPMG and The Business Times of Singapore, it is well supported by various government agencies and associations. We were one of the winners in 2011 for our business model and rapid expansion into the regional markets.

“...first water company in Singapore to have won this brand awards...”

Singapore Prestige Brand Award (SPBA) was launched in 2002 by the Association for Small and Medium Enterprises (ASME), sponsored by Singapore Press Holding's Lianhe Zaobao (the mainstream Chinese Newspapers in Singapore) and Citibank (Singapore). It has been a major and highly respectable award in Singapore.
